

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

Please replace the second paragraph on page 29, which begins on line 5, with the following paragraph:

Figure [[191]] 19 is a user interface for obtaining physical address information from the customer. The user interface provides text boxes and/or drop-down lists for the user to input a residential address, including: address type, house number, street name, apartment/suite identifier and number, city, state, and ZIP code. A set of “radio buttons” is also provided for the customer to indicate whether the mailing address (i.e., physical address) is the same as the residential address. The address type field can be used to trigger data capture tools, such as a set of templates for various address types, including Post Office box address, street address, etc.

Applicants note that this paragraph is correct in the as-filed application. The Office introduced this error in the published application.
